

GEC Seminar Series presents...

Joshua D. Rhodes, Ph.D.

Major Energy Trends:
There and back again, how the next 30 years of energy might look

October 31st, 4-5pm BME 3.204

Joshua D. Rhodes, Ph.D. is a Research Associate at the Energy Institute and the Webber Energy Group at the University of Texas at Austin. His current research is in the area of smart grid and the bulk electricity system, including spatial system-level applications and impacts of energy efficiency, resource planning, distributed generation, and storage. He consults on a broad range of energy topics as well as vetting for novel technologies -- often sitting on vetting committees for companies looking to enter Austin's technology incubators. He is also a regular contributor to Forbes and is an AXIOS Expert Voice. He holds a double bachelors in Mathematics and Economics from Stephen F. Austin State University, a masters in Computational Mathematics from Texas A&M University, a masters in Architectural Engineering from The University of Texas at Austin and a Ph.D. in Civil Engineering from The University of Texas at Austin. He enjoys mountain biking, rock climbing, and a good cup of coffee.

Frighteningly Delicious Halloween Cookies from Tiff's Treats & Torchy's Tacos provided.
